LIFE. AUTOMATED.

If at the touch of a button..

Sleep Tight. As you turn in for the night, you simply push a button that instantly gives you the perfect late night lighting. While you stay cozy, the garage doors close, all the electronic equipment turns off, the thermostats set at your desired temperature, and the alarm is armed. Good night.

Security. It happens to all great moms. After picking up the kids from the ball game that went into overtime and swinging by the grocery store for the night's dinner, it has grown dark. During the drive home, you are dreading going into a dark house. With a quick call from your cell phone, you can activate an arrival scene that sets both outdoor and indoor lighting levels to a preset that welcomes you home.

Serenity. At the end of a full day, you are ready for quality time to unwind. You grab your glass of wine and your favorite novel while the bathroom shades draw closed, the lights adjust to the perfect level, and your favorite music begins to play creating the perfect mood to sooth away the day's troubles.

Safety. After rushing out the door, you drive along wondering if you've turned off the stove or turned on the alarm. A departure button solves that problem. As you leave, initiate a sequence that turns off all of the media, lights, and controlled receptacles with the touch of a button. In addition, the alarm is armed and the garage doors are closed. And if you forget to press the button, don't worry. Simply call from your cell phone to initiate the same sequence. Live worry free.

Smart. Automated systems allow you to control and manage energy more efficiently. These systems can sense occupancy and react by adjusting to lighting, HVAC, and shades, which helps to reduce the use and cost of energy. Go Green.

Today's lifestyles are hectic and your time at home is a well deserved luxury. It's where you relax and recharge, bond with your family, entertain your friends, and make life long memories. Often a great deal of thought goes into the architecture, flow and furnishings of your home. But, very little thought goes into how much technology can contribute to making home feel like home.

Imagine an automated system that can set the perfect mood for any occasion by controlling the lighting, audio, video, shades and climate by a single button press on a touch panel, keypad, or even your cell phone. In addition, the same system will always remember to close the garage doors, water the plants, clean the pool, arm the security system, and more...all while helping to reduce energy costs.

We can't control everything in your life but we can control everything in your home.

Compact and portable, our touch screens allow you to do away with piles of remotes and cryptic control panels, affording true "one-touch" control over a broad range of complex devices and systems.

What our clients are saying

"Our system has enhanced our lives and helped us to control energy costs. We also like the fact that the system can be modified remotely; therefore, as our needs change, so does the system."

*-The Epple's
Lake Burton, GA*

"Wow is all we can say about the theater these guys put in. They were on time, on budget, and great to work with."

*-Brad Ikeda
Gainesville, GA*

LIFE. AUTOMATED.

From the President

Hello, I am Doug Ward, President and CEO of Doug Ward Integration. I would like to thank you for taking the time to learn more about the services we offer. Technology enhances each of our lives and our lifestyles on a daily basis. For us, it is a very rewarding feeling to take a client's wants and needs, combine it with our passion and imagination, and deliver a project that gives you complete control of everything in your home. Since 1998, we have had the privilege of providing hi-end technology services to some of the most prestigious addresses throughout the southeast. If you are looking for a way to effectively control everything in your home, I would love the opportunity to show you how you can live your life. Automated.

WE WILL:

- Listen to your individual needs!
- Design a system that will meet your high expectations!
- Deliver a "Best in Class" product and experience!
- Do what we say we will do, when we say we will do it!
- Not compromise on integrity or quality!
- Be deserving of your recommendation of our company to your friends and family!
