How would your congregation describe the worship service?

Is it engaging and moving?

Does your facility provide an environment that encourages worship?

Do you feel that your congregation retains your message?

Lets face it. The way we worship today has changed. While just a few years ago media was a medium quality sound system and a still slide projector, today's multimedia systems deliver the dynamic, effective communications with your audience that enhances the worship experience, and impacts lives.

At Doug Ward Integration, we address the unique and complex media challenges that you and your staff face, on a daily basis. We work closely with our manufactures engineers and reps to make sure that the products and services that we offer allow you to manage, monitor, and secure all of the technology components of your campus in the most reliable and efficient manner.

In addition to engineering and installing your systems, we can provide comprehensive training for your staff, and provide support as needed. Our goal is not to sell you something that you do not need, but to be a resource that can help you make decisions and strategically implement technology as your needs change.

What our clients are saying

"Partnering with DWI was a great experience. They were on time, on budget, prepared, and put our needs first. We could not be happier."

**-Pastor Greg Martin
Wayside Christian Church**

"I still can't believe the difference in our services now that the technology is dialed in. DWI did a great job with the install and training our staff."

**-Pastor Mike Smith
Family Fellowship**

LIFE. AUTOMATED.

From the President

Hello, I am Doug Ward President and CEO of Doug Ward Integration. I would like to thank you for taking the time to learn more about the services that we offer.

Technology enhances each of our lives on a daily basis and certainly within a house of worship. For us, it is very rewarding to take a clients wants and needs, and combine them with our passion and imagination, and deliver a project that is a tool to help others worship.

Since 1998 we have had the privilege of providing technology and media services to churches in the North Georgia Area in both new construction and retro fit applications. So whether you are considering upgrading your wireless microphone system, going digital or need a complete design and install I would love the opportunity to show you how to live Life. Automated.

WE WILL:

- Listen to your individual needs!
- Design a system that will meet your high expectations!
- Deliver a "Best in Class" product and experience!
- Do what we say we will do, when we say we will do it!
- Not compromise on integrity or quality!
- Be deserving of your recommendation of our company!
